Abstract:

Man born in the earth, in his life period, used everything created by nature according to his desire, either by reforming them or not reforming them. Also, right from the beginning, he has made developments for somethings in nature and brought few things in the nature in a new shape by destruction. Nature has attained evolution either by natural means or by artificial means by the mankind for his needs. As long as the sun family and mankind exist. This will continue. The rituals and customs are also subjected to this evolution. Traditionally whatever discovered by the mankind and as per the circumstances, the Astrological science has been improved without reforming its taproot. This astrological science has many subsects within it. But prediction in all the subsects of astrology is given by position of Sun, Moon other five planets, and Ragu, Ketu. To find out when and where the obstacles will come in the life time, how to cross over, what is the karma in this birth, how to handle this karma carefully, what are the responsibilities in this birth, Dimba Chakra is helpful by considering the Rasi Chart as body and by the help of Planets and position order of the stars.

Key Words: Nakshatra, Graha, Human Body Parts, Dimba Chakra.

Introduction:

Dimba is Sanskrit word. The meaning of Dimba is "Infant". Prediction of the horoscope of a person is done on the basis of finding the part of the body where the birthstar, on which Moon is located. This is done by starting with the star of the Sun, the leader of solar system, and placing it in series in the body of the person. Sun gives the power of light to all living beings in the universe. Sun is the Paternal planet. Sun gives the Life and soul to the body. Moon gives body to the soul. If there is no body, no soul will exist. Hence the birthstar where the moon stood is also considered important.

Method of Forming Dimba Chakra:

नाभौचलिङ्गोचतथैकमेकंद्वजानुनोःपदायुगेभषट्कम्।
पुंसासदावैपरिकल्पनीयं मुनिप्रवर्येफलमुक्तमत्र।।

By listing the star in proper sequence where Sun stood (located), placing the parts of the body Viz, Forehead, Face, Shoulder, Chest, Naval, Forearms (R and L), Genital organ, Hands, Thighs (R and L), Feet, in series, prediction is done on the basis where the Moon is located in the parts of the body along with the concerned star.
